

Jim Cerney, Training Director – Omaha (JCerney@IT4E.com)

An Air Force Academy graduate, Jim completed a distinguished career flying B-52 bombers and teaching others to fly them. Jim retired from the Air Force in 1994 with the rank of Major.

Cerney immediately applied his technical and training skills to computer networking and by 1997 he became a Master Certified Netware Instructor (MCNI), Microsoft Certified Systems Engineer (MCSE) and Microsoft Certified Trainer (MCT) and a host of additional designations. (Click to view)

Jim specializes in the infrastructure side of your networking environment and has been teaching and consulting the Windows Server environment since NT 3.51, desktops since Windows 3.11, System Center since it was SMS 1.2, and Exchange since 5.0 and Lync since it was Office Communicator 2000. An early implementer of the Active Directory environment, Jim was invited to help train the 450 initial Microsoft tech support hires for the Windows 2000 rollout
